Half Day Seminar on Intertwining of Laws in the Technology World

Dear Members,

The rapid advancement of technology has brought about significant changes in the way we live, work, and communicate. There is advancement of block chain technology used in our daily lives for transacting commercially or metaverse for converging physical and virtual realities technology as envisioned in the new arenas of life. However, these advancements have also raised concerns about privacy, data protection, and the legal implications surrounding the use of technology. This program aims to provide participants with a comprehensive understanding of the laws relating to technology and data protection, equipping them with the knowledge to navigate legal challenges in the digital age.

PROGRAM OBJECTIVES:

- Familiarize participants with the fundamental concepts and principles of technology law and data protection.
- Explore the legal frameworks and regulations governing technology and data protection.
- Examine the implications of emerging technologies, such as artificial intelligence, internet of things, and block chain, on existing legal frameworks.
- Understand the rights and responsibilities of individuals, organizations, and governments in the context of technology and data protection.
- Equip participants with practical strategies for compliance with data protection regulations and best practices for ensuring privacy and security in the digital era
