

‘E-Learn’ - A Virtual Learning Initiative

AI Co-Pilot and Chatbot for Professional Services Firms

In recent years, the advancement of Artificial Intelligence (AI) has rapidly progressed, making sophisticated Language Learning Models (LLMs) accessible to the general public. These new technologies have the potential to disrupt the way of functioning of enterprises including Professional Services Firms.

BCAS has been at the forefront in equipping its members with the skills needed to effectively handle today's professional challenges. Leveraging the capabilities of AI tools can improve our professional lives and enable us to engage in more fulfilling work. Failure to do so, may even cause an existential crisis.

While the impact of AI is well understood and appreciated, lot needs to be done on showcasing practical use-cases and driving the adoption of these new technologies. With this objective in mind, the BCAS has organized a hands-on workshop on Co-Pilot and Co-Pilot Studio along with leveraging the power of a conversational chat-bot.

Join us for this one-of-a-kind insightful workshop and start your journey on the AI highway.

Session 1: Deep-dive into Co-Pilot and Co-Pilot Studio with Use-Case for Chartered Accountancy Practitioners

- **Enhanced Efficiency:** Learn how Co-Pilot and Co-Pilot Studio can streamline routine tasks in CA practices, such as automating data entry, financial analysis, and report generation.
- **Custom Solutions:** Explore how Co-Pilot Studio can be tailored to meet the specific needs of CA firms, improving workflow and client service.
- **Implementation Strategies:** Gain insights into integrating Co-Pilot into existing systems and ensure smooth adoption within the practice.

Session 2: Build Your Own AI-Powered ChatBot (Live Demonstration)

- **ChatBot Fundamentals:** Acquire a basic understanding of AI-powered chatbots, including NLP and machine learning.
- **Practical Demonstration:** Witness the step-by-step process of building and deploying a chatbot, including customization for specific business needs.
- **Real-World Applications:** Identify key use cases for chatbots in automating customer support and enhancing internal communication.

The details of the workshop are as follows:
