Transforming Tax Practice with AI: A Practical Approach for Professionals on automating compliance, litigations and drafting

The world of tax is evolving, and Artificial Intelligence (AI) is at the forefront of this transformation. As tax regulations become increasingly complex, professionals need smarter tools to stay competitive and ensure compliance. In this ground-breaking webinar, "Transforming Tax Practice with AI: A Practical Approach for Professionals," we will delve into how AI is revolutionizing tax practices, offering innovative solutions for automating compliance, simplifying litigation processes, and enhancing the efficiency of drafting crucial tax documents.

Key Take-away From the Session:

● Response automation for IT & GST notices using AI tools
● Pre-scrutiny of Income Tax Returns through AI checks
● Digital documentation of tax & GST compliances
● AI-assisted maintenance of compliance calendars
● AI-based summarization of tax publications & updates
● Implementation of ICAI's CA GPTs in routine work
● Development of custom GPTs for internal knowledge management
● Creation of BOTs for training and client tax query handling

The details of the workshop are as follows:
