Lecture Meeting on The World in 2026 and Beyond

Dear All,

Several big political, economic and technological changes and other dramatic developments are expected to shape the world in 2026. There could be several other path breaking changes which will impact the world for a decade from 2026 to 2036 like:

- Will there be the Third World War?
- Will Artificial Intelligence find remedy to Cancer and Alzheimer's or will it go out of human control?
- Will the world economy collapse or dramatically transform due to new scientific discoveries?

Mr. Sundeep Waslekar, a thought leader on global future and author will discuss these questions drawing from his personal conversations with world leaders about the things that we do not read in the media.

Topic Coverage	The World in 2026 and Beyond
